1. Variety name : SCABIOSA stellata Drumstick

2. Description :

This ancient annual Scabiosa is now widely used again as dried flower. The 2,5 cm large pale-blue flowers change into bronze globe-shaped seedpods consisting of many starry seeds. Papermoon is the very suitable English name for this variety.

3. General :

- a. colors : white flowers followed by bronze seedpods
- b. height : 60 cm
- c. life cycle : annual
- d. weight of 1000 seeds : 33,3 gr
- e. time sowing/flowering : 15-18 weeks
- f. family : Dipsacaceae
- g. hardiness zone :

4. Sowing instructions :

- a. method : directseeding
- b. time : April/May
- c. temperature : 12-18°C
- d. germination time : 7-14 days
- e. seed quantity or plants per m² : 2 gr

5. Growing on :

- a. distance between rows and/or plants : 25 cm between rows
- b. soil : any well-drained humous soil
- c. irrigation : overhead irrigation can be used until flowering
- d. optimum temperature : 15-22°C
- e. diseases/pests : -
- f. fertilization : -

6. General advice :

- a. cutting period : July-August
